Palindrome or Not – Java Program

Program

```
import java.util.Scanner;

public class Palindrome {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        int n = sc.nextInt();
        int original = n;
        int reverse = 0;

        while (n > 0) {
            int digit = n % 10;
            reverse = reverse * 10 + digit;
            n = n / 10;
        }

        if (original == reverse) {
            System.out.println("Palindrome");
        } else {
            System.out.println("Not Palindrome");
        }
    }
}
```

Sample Output

Input: 121

Output: Palindrome

Input: 123

Output: Not Palindrome

Logic

Reverse the given number and compare it with the original number. If both are equal, the number is a palindrome; otherwise, it is not.
